Profile

Backend developer with strong expertise in Java, Spring Boot, Docker, and Kubernetes. Experienced in CI/CD automation, API development, and code quality improvement with 100% test coverage. Proven success in reducing deployment cycles, enhancing scalability, and delivering production-ready solutions for enterprise clients.

Professional Experience

Senior Software Engineer, Accenture (Client: J.P. Morgan Chase, CIB) 02/2025 – Present
Bengaluru, Karnataka, India

- Modernized legacy .NET transaction tracking system (Eserve) into Spring Boot microservices, improving scalability and reducing downtime.
- Authored detailed documentation of legacy workflows, enabling smoother knowledge transfer and reducing onboarding time for new developers by 30%.
- Achieved 100% unit test coverage and improved SonarQube compliance score to 95+, ensuring robust code quality and maintainability.
- Containerized applications with Docker and automated deployment using Jules scripts on GKP (JPMC's Kubernetes platform), cutting deployment effort by 40%.
- Streamlined CI/CD pipelines with Jenkins, reducing release cycle time from weeks to days across DEV and UAT environments.
- Delivered secure, production-ready REST APIs for frontend integration, enabling faster UI team adoption and reducing integration defects.
- Enhanced collaboration and code quality through peer reviews and static analysis using BMAD, GitHub Copilot, and Claude.

Tech Stack: Java, Spring Boot, Docker, Kubernetes (GKP), Jenkins, GitHub Copilot, BMAD, Claude

Senior Software Engineer, Accenture (Client: MOE, Singapore) 06/2024 – 01/2025
Bengaluru, Karnataka, India

- Educational Project (Singapore): Designed to store comprehensive school data, encompassing student and academic records, in a centralized database.
- Ensured up to 90% unit test coverage by implementing rigorous testing with Junit and Mockito.
 - Diagnosed, analyzed, and resolved defects across UAT and production environments based on client requirements.
 - Engineered and optimized automated PDF and Excel report generation using Jaspersoft Studio.

Senior Software Engineer, Capgemini (Client: Boeing) 10/2021 – 05/2024
Bhubaneswar, Odisha, India

- Aerospace and Aviation Project (Boeing): Worked on OnePDL, a proprietary ETL tool that extracts, processes, validates, and transforms data as per the SPM tool.
- Analyzed business and resource requirements to develop effective solutions.
 - Developed microservices for efficient data transformation using Spring Boot, Spring Data JPA, Spring MVC, Swagger API, and MySQL.
 - Hands-on experience with JUnit and Mockito, utilizing JaCoCo to ensure high code coverage.
 - Basic knowledge of Kafka with Spring Boot for real-time data streaming.

- Familiar with CI/CD pipelines using Jenkins and Docker.
- Managed tasks efficiently using JIRA within an Agile framework to ensure timely project delivery.

Education

Master of Computer Applications, *College of Engineering and Technology*

08/2019 – 05/2021
Bhubaneswar, Odisha,
India

Skills

Core Java / Java 8 Features

Technical Tools & Infrastructure

- MySQL
- Junit and Mockito
- Kafka
- Jenkins and Docker
- Monitoring tools (Grafana and Prometheus)
- AWS
- Kubernetes

AI

- Gen AI
- Agentic AI
- Github Copilot
- Claude and ChatGPT

Spring Ecosystem

- Spring boot
- Spring MVC
- Spring Data JPA
- Spring Cache
- Spring Batch
- Spring Scheduler

Methodologies

- MultiThreading
- Jira and Agile Method

Awards

Rising Star, *Capgemini*

- Best Employee Award
